Commenter Type:

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: This is my statement of support of the proposed community hub and place of worship. I believe this project in no way hinders the daily life of the residents and surrounding areas. There is a demonstrable local demand for multi-purpose community spaces especially for Muslims.

This hub will foster social inclusion, provide health and well-being benefits to not just that group but for all people.

Regards the worries around more traffic and noise, the actual facility is in such a location that it could hardly impact local traffic especially during its times of operation.

Also there should be no concerns regards the proposed design which takes into account the residential character of the area. its development will not harm local peace and tranquility or affect access.

Also this is a significant private investment into community infrastructure. It provides a "place of worship" (Class F1) and a community hub without requiring public funding, while still contributing to the borough's social fabric.

This proposal transforms a redundant site into a vibrant community anchor. We respectfully urge the Planning Committee to approve application DM2025/01591, as it is demonstrably in accordance with both local and national planning policy.
