Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I wish to register my support for planning application DM2025/01591. This is a sensible, policy-compliant proposal that will make good use of a vacant site and serve the local community.

The applicant has taken environmental matters seriously. The full range of assessments has been submitted, the Biodiversity Net Gain requirement is met, and the external improvements will transform a hard-surfaced vacant site into something greener and more ecologically productive.

Moreover, there is a real need for community facilities in the Belmont area. It is predominantly residential with limited provision for community activities, educational programmes, or faith worship. This application addresses that gap directly.

I note that the operating hours can be conditioned by the Council if it sees fit. The applicant has already proposed restricted hours and a daytime-weighted programme of activities. I do not see late-night disturbance as a realistic concern.

I would also note that I want to emphasise that the community hub will serve all residents regardless of faith or background. The programme includes educational classes, wellbeing sessions, and social events that are open to everyone.

Moreover, the consultants tested a worst-case scenario using actual sound measurements from the congregation at their current venue, and it still came in below background noise. The noise assessment is thorough and the conclusion is clear: the facility will not generate noise above existing background levels.

For all of these reasons, I strongly support planning application DM2025/01591 and I ask the London Borough of Sutton to grant planning permission.
