Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I would like to express my support for planning application DM2025/01591. This proposal is reasonable and adheres to policy guidelines, making effective use of an unused site while benefiting the local community.

The noise assessment was based on actual measurements rather than theoretical models. The consultants captured real sound levels from the congregation at their current venue and evaluated how that noise would travel through the proposed building materials. The outcome: noise levels at neighboring properties will remain below the background noise.

The proposed development is modest, consisting of a part one, part two-storey extension with a slight height increase to the existing structure. The plan includes external greening, cycle storage, and enhanced refuse arrangements, all of which will enhance the site's appearance. There is no new upper floor that would lead to overlooking or overshadowing. Furthermore, the transition from a 24-hour ambulance station to a community facility with defined operating hours signifies a significant decrease in the site's usage intensity. Neighbors should view this positively rather than objecting.

The application clearly illustrates a growing demand for this type of facility in the area. The demographic data is persuasive, and the current provision is inadequate. This proposal fills a noticeable gap.

Moreover, while the faith provision addresses a specific need, the community hub-with its educational programs, drop-in sessions, and wellbeing activities-is designed for everyone in the

neighborhood. I support this application because it caters to the entire community.

Prayers occur at midday, while the school run takes place in the morning and mid-afternoon. There is no overlap between Friday prayer times and the school run at Avenue Primary Academy. This concern, although understandable, is not based on the actual schedule.

I urge the London Borough of Sutton to approve application DM2025/01591. It is thoughtfully planned, complies with policy, and will provide genuine benefits to the community.
