Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: While the provision of faith facilities is recognised as part of community infrastructure, this proposal raises concerns regarding its impact on the wider residential environment. The anticipated benefits appear to serve a defined user group, whereas the associated pressures - particularly parking displacement, traffic congestion, and noise during peak attendance periods - would affect the surrounding community more broadly.

The site has limited on-site parking, and nearby streets already operate under constrained capacity. On high-attendance days, significant overspill parking and increased vehicle movements are foreseeable, which may undermine residential amenity, road safety, and general wellbeing.

To align with planning objectives for inclusive and sustainable development, it is essential that these cumulative impacts are robustly assessed and mitigated before approval is considered.
