Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: This proposal should be carefully assessed in terms of its impact on overall community wellbeing and local infrastructure capacity. While faith facilities provide value to their congregations, the wider implications for surrounding residents must also be fully considered.

The building offers limited on-site parking, and the neighbouring streets already experience constrained availability. On peak prayer days, this is likely to generate significant overspill parking, increased traffic movements, and associated noise, potentially diminishing residential amenity and quality of life for nearby households.

Without a clear and enforceable mitigation strategy, the development risks placing disproportionate strain on the immediate area, which would be inconsistent with objectives for sustainable and well-integrated neighbourhoods.
