Comment Reasons:

Comment: There is a major traffic problem already due to the Avenue school drop off and pick up. All surrounding roads become totally blocked at peak times. In fact when this happens buses struggle to get down the road as it becomes single file. Within the last 5 years we've had accidents outside our home where cars have driven into each other. Plus the fact we also have cars parking over our driveway and blocking our exit. We have complained to the school and they have done nothing. With children in the vicinity too, it's only a matter of time when there will be an accident with potential injury or even death.

The prayer centre is not necessary as there are already 3 in the vicinity. More prayer centres will result in more chaos in traffic. Friday afternoon at the local church becomes a nightmare when prayers happen.

A prayer centre is not in keeping with the local area. A small block of flats with parking for each one would be more suitable. Whilst also reducing the potential increase in traffic. More traffic will lead to more noise. We already have over bearing noise at school pick up and drop off times.

More traffic will make it more difficult for vulnerable people with health problems. My wife has health issues and here have been several times over the years she has struggled to get out of our driveway due to parents and teachers at the Avenue school covering our dropped kerb. An increase in traffic will make this worse.
