Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a local resident to express my support for planning application DM2025/01591.

From a planning perspective, I believe this proposal responds positively to a number of important considerations.

Community benefit

The development would provide valuable community space in line with Sutton's Local Plan priorities. In addition to its primary use, the inclusion of educational activities and dedicated provision for women's health and wellbeing would offer meaningful services that many local residents can benefit from. Facilities like this play an important role in strengthening community ties and supporting local families.

Design and fit within the area

The building itself is modest in scale and remains in keeping with the surrounding residential character. The retention of existing greenery helps soften its appearance and ensures it integrates sensitively into the street scene rather than dominating it.

Parking, highways and thoughtful management

With 12 on-site parking spaces, including two disabled bays, the level of parking appears

proportionate. The commitment to stagger Friday prayer times to avoid overlap with nearby school pick-up hours is a sensible and responsible measure. It shows a clear intention to manage activity carefully and minimise any impact on traffic flow and pedestrian safety.

Impact on neighbours

This is not a high-intensity use, and with proper management in place, it should not give rise to unacceptable levels of noise, light disturbance or traffic. Planning conditions, if required, can ensure that residential amenity is protected.

Overall, this represents a sustainable reuse of the site that would bring clear community value. I respectfully ask the Council to approve the application.
