Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:Re: Planning Application DM2025/01591 - Objection

I write to formally object to the above application.

1. Highway Safety & Traffic Impact

The proposed change of use to a Place of Worship and Community Hub will materially increase vehicle and pedestrian movements, particularly during concentrated service and event times.

Dorset Road and surrounding residential streets already experience congestion during peak hours. The proposal is likely to result in:

Increased vehicle queuing and unsafe turning movements

Obstructive and overspill parking in residential streets

Reduced visibility and compromised road safety

There is no clear evidence within the application demonstrating that the local highway network can safely accommodate this intensified use.

2. Impact on Avenue Primary School - Child Safety Risk

Avenue Primary School is located within approximately 1km of the site and shares the same local road network.

School drop-off and pick-up periods coincide with typical times of worship or community gatherings. This overlap creates foreseeable conflict between:

Increased vehicle movements

High volumes of young pedestrians

Informal parking and drop-off activity

The application does not provide sufficient mitigation measures to safeguard vulnerable road users, particularly children.

3. Insufficient Parking & Traffic Management Strategy

The proposal lacks:

A robust Transport Assessment

Clear parking capacity evidence

Managed drop-off and dispersal planning

Event traffic control measures

Without enforceable safeguards, the development would result in unacceptable impacts on highway safety and residential amenity.

Conclusion

Given the unresolved and significant highway safety concerns - particularly in relation to children and peak traffic periods - I respectfully request that Sutton Council refuse this application unless a full and independently verified Transport Assessment clearly demonstrates no adverse impact on traffic flow or pedestrian safety.
