Comment Reasons:

Comment:Objection to Planning Application DM2025/01591

I wish to register my objection to this application on the grounds of highway impact and public safety.

Traffic and Road Capacity

The proposed use represents a significant intensification compared to the existing use of the building. A place of worship and community hub typically generates high attendance at specific times, leading to clustered arrivals and departures.

The surrounding road network, including Dorset Road and adjoining residential streets, is not designed to accommodate sudden spikes in traffic flow. Increased vehicle movements are likely to result in:

Congestion at junctions

Informal or illegal parking

Reduced road visibility

Obstruction to residents and emergency vehicles

There is insufficient evidence within the application to demonstrate that these impacts have been properly assessed or mitigated.

Proximity to a Primary School

Avenue Primary School operates within close proximity to the site and relies on the same local road network.

School start and finish times already create heightened traffic and pedestrian activity. Introducing additional event-based traffic in the same area raises clear safety concerns, particularly for young children navigating crossings and pavements.

The application does not appear to include a detailed strategy addressing:

Safe pedestrian management

Coordinated timing of events

Controlled parking and dispersal arrangements

Lack of Comprehensive Mitigation

Given the scale of potential attendance, a thorough Transport Assessment and structured traffic management plan should be a minimum requirement. Without enforceable safeguards, the proposal risks creating ongoing congestion and safety issues for residents and school families alike.

Request

For the reasons outlined above, I respectfully request that Sutton Council give serious weight to these highway and safety concerns and refuse the application unless robust, evidence-based mitigation measures are secured.
