Address: 10 Leslie Gardens Sutton Sutton SM2 6QU

Comment Details

Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I would like to object to the proposed redevelopment of the former ambulance station. While community facilities are noted, the scale of this specific proposal is incompatible with the quiet, residential character of this neighbourhood and the safety requirements of the adjacent primary school.

Impact on Highway Safety and School Pupils:

The transition to a high-capacity Place of Worship (F1) and Community Hub (F2) will generate significant vehicular intensification. This residential area already experiences high traffic stress during school drop-off and pick-up periods. The addition of congregational traffic will create dangerous bottlenecks, increasing the risk to young pedestrians. The proposed cycle and refuse stores further suggest a level of occupancy that the narrow residential street infrastructure cannot safely support.

Loss of Residential Amenity:

The residential environment is highly sensitive to noise. The proposed mixed-use facility will draw large groups simultaneously. The noise from increased footfall, car doors, and congregational activity—often during early mornings or late evenings—will cause an unacceptable level of disturbance to neighbouring homes.

Overdevelopment and Massing:

The part-one, part-two storey extensions and the overall increase in building height represent an over-intensification of the site. This increased massing will appear overbearing in a residential context.

The proposal fails to demonstrate that it can operate without compromising the safety of school children or the fundamental peace of this residential community and hence this objection.
