Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support this proposed planning change. I have lived in the area for over 10 years and have seen firsthand the need for improvements that benefit the whole community. There are several compelling reasons why this change should be approved.

The inclusion of a community centre would provide valuable facilities and activities for residents of all ages - from young people to older members of the community. This type of shared space is much needed in our area and would make a positive and lasting contribution to local life.

In addition, the development plans are in keeping with the surrounding buildings and the local character of the area. The design integrates well with existing structures and does not feel out of place. Concerns regarding parking have also been carefully considered and addressed. The timing adjustments for Friday prayers help to minimise congestion, and the site itself provides sufficient parking capacity to accommodate other prayer times without negatively impacting the surrounding streets.

It is also worth noting that the Muslim community has been using the church premises for several years without issue. This demonstrates that the use is already well-established, managed responsibly, and has not caused disruption to local residents.

Overall, this proposal represents a thoughtful, well-considered, and beneficial development for the area, and I fully support its approval.
