Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: This proposal is about strengthening community life through shared values of respect, service, compassion, and responsibility. A mosque is not simply a place of worship - it is a community hub that provides family support, youth engagement, and charity initiatives, while encouraging members to be considerate neighbours and active contributors to wider society.

The Belmont and Sutton Muslim Association promote the values of good character, service to the community and care for our neighbours, so I am confident that the mosque will have these values at its core.

The presence of the mosque can promote social cohesion. It creates opportunities for interfaith dialogue, charity events, and community that bring people of different backgrounds together. Rather than dividing communities, such spaces often become bridges that foster understanding and reduce misconceptions.

For children and young people, a mosque provides activities and mentoring in a safe environment. This helps promote discipline, moral development, and respectfulness to our community. For adults and families, it offers a supportive space for connection and community involvement. These benefits strengthen families, and strong families strengthen neighbourhoods.

Concerns from nearby residents should absolutely be heard and addressed with care. However, planning conditions and responsible management can ensure that matters such as parking and any noise are handled respectfully.

We should support a diverse community. Supporting this mosque is a statement that we value inclusion, mutual respect, and the right of all residents to practise their faith in a safe manner.

I urge the council to consider the social benefits this development would bring to families, young people, and the broader community.
