Commenter Type:

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: The proposal is an asset to the community, and concerns that have been raised regarding congestion should be addressed as suggested. The building does have car parking spaces, which should alleviate roadside parking, and foot traffic is likely to be common in the area rather than traffic caused by cars. Also, due to proximity for many, some may choose to carpool, or even bike to the property (alongside walking) - these are options that should be encouraged within the community for the community centre (the availability of bike racks is testament to this). Max capacity is only likely to be reached on Fridays as well, rather than all days of the week. Also, the timings of the five daily prayers vary throughout the year, and so, the window whereby one of the prayer times coincides with the school pick up and drop off times is quite small on any given day.
