Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I would like to object the application DM2025/01591 for changing the use from Ambulance station to Place of worship/community hub and converting to two story building as this will permanently change the sub-urban character and nature of the neighbourhood.

The tranquil and peaceful neighbourhood is surrounded by family houses, Avenue School, local care home, Bowling club, Overton Park, et al. I run at the Overton park multiple times in a week, I walk on Dorset road and used to work at Avenue school. This change will lead to increase in the traffic of vehicles and movement of people will be affecting the children, parents and grand parents who walk on the Dorset road and other surrounding roads.

I object on the grounds of pedestrian safety. Dorset Road is already congested; adding significant traffic surges near Avenue Primary School (1,000+ pupils) during peak hours is a major safety risk. The applicant's own documents admit to massive overspill parking on residential streets, which will block sightlines and create a hazardous environment for children.

I strongly object to DM2025/01591. The parking shortfall is unsustainable for a residential street, leading to dangerous congestion. The noise and disturbance from late-night use will harm the quiet character of the area and impact vulnerable neighbours. This proposal represents an over-development of the site that the local infrastructure cannot support.
