Comment Reasons:

Comment: I strongly support this development.

The proposal goes beyond faith provision to include a genuine community hub. A mosque is not only a place of worship for many muslims in the area, but it serves as a community space for children, women, elderly. It also provides educational programmes, family support, youth engagement, and charity initiatives, while encouraging members to be considerate neighbours and active contributors to wider society.

The presence of a mosque can actively promote social cohesion. It creates opportunities for interfaith dialogue, open days, charity events, and community outreach that bring people of different backgrounds together. Importantly, Islamic teachings emphasise good character, kindness, and maintaining positive relationships with those who live nearby.

Additionally, a mosque would be incredibly beneficial for residents who live in Cheam/Belmont as it will provide somewhere in close proximity which is needed for this area. This will be in walking distance for many Muslims living in the area and will mean we do not need to drive to other places- it will reduce the need to use cars and other mosques in the area have become very full so there is a practical need.

Our community is enriched by diversity. Supporting this mosque is a statement that we value inclusion, mutual respect, and the right of all residents to practise their faith in a safe and dignified manner. When people feel seen and supported, they are more likely to contribute positively to the wider society.

I urge the council to consider not only the concerns raised, but also the long-term social benefits this development would bring to families, young people, and the broader community.
