Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:1) I am very concerned about the limited parking and that Balmoral Way will become more of a parking lot than a residential estate in which I have lived for over 30 years. Note, it is bad at the moment due to parking by parents of school children but, we put up with it because it is a school. It would become intolerable if dozens of extra cars will have to be catered for.

2) This is a residential area and are concerned about late night noise disturbances regarding vehicles, people etc.

3) Emergency vehicles access (there is only one entrance to Balmoral way and that is directly opposite the site. (Most of the residents are of middle or of advanced age).

4) Safety of school children as they can be all over the road at school exit.

5) In short, there are times when there is saturation of vehicle traffic/parking at the moment any extra is guaranteed to cause havoc and major inconvenience to the residents of SM2 6PD. Also because the site is proposed both for religious and social purposes, this comment is very relevant.

6) In addition I am concerned that the building could be out of character with the residential status of the residential neighbourhood.

7) It is clear from a cursory check that many of those in support of the development are not resident in the immediate area and have been "bussed in" in order to try to overwhelm the concerns of the local people.
