Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I express my full support for this planning application to transform the former ambulance station into a Masjid and Community Centre.

This development would address a clear and increasing need within the borough. At present, Muslim residents do not have adequate local space for worship or community activities, which forces many families, elderly individuals, and young people to travel considerable distances. Establishing this facility would provide accessible, local provision and greatly benefit the community.

I would also like to respond to some of the concerns raised in the objections. Regarding traffic: the site previously functioned as a 24-hour ambulance station, with large emergency vehicles operating at all times of day and night. In comparison, a place of worship and community centre would produce significantly less traffic, occurring mainly at set and predictable times. This represents an overall reduction in disruption for nearby residents and the neighbouring school.

In terms of noise and general amenity: mosques and Islamic centres throughout the UK are long-standing, respected community institutions. They are typically peaceful, well-managed environments and are not associated with antisocial noise or disturbance. The objections raised do not accurately reflect the way such facilities operate in practice.

Bringing a vacant building back into meaningful use as a welcoming community hub - providing prayer facilities, educational programmes, youth engagement, and support services accessible to all - would be a positive step for the area. I strongly encourage the planning committee to grant

approval for this application.
