Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing to the Council to express my support for the planning application at the former ambulance station on Dorset Road (DM2025/01591). I think this is a good proposal that merits approval.

I want to emphasise that the community hub will serve all residents regardless of faith or background. The programme includes educational classes, wellbeing sessions, and social events that are open to everyone.

In addition, there is no basis for the suggestion that this facility will cause late-night disturbance. The operating hours are restricted and the applicant has set out a programme of activities that is weighted towards daytime use.

Additionally, a community centre with restricted hours versus a 24-hour emergency vehicle depot. The comparison speaks for itself. The proposed use is a clear improvement in amenity terms for the surrounding residential streets.

On this point, objectors seem to have missed that the previous use had 21 parking spaces on site. The development reduces this number, not increases it. Additionally, the yellow lines that currently restrict on-street parking near the entrance will be removed, giving residents more kerbside space than they have now.

Moreover, the submitted noise report confirms that the building fabric will contain sound effectively. This meets the Local Authority's criteria. Even at the busiest time, with amplified

speech during Friday prayers, the noise reaching neighbouring properties is predicted to be below ambient background levels.

I have read the Transport Statement and the parking evidence is convincing. A survey during the peak Friday prayer period found on-street parking at less than 50% capacity in the surrounding area. The worst-case modelling still leaves 66 spaces available and stays well under the 85% parking stress threshold.

This proposal ticks every box: it is policy-compliant, well-evidenced, and really needed. I ask the Council to grant planning permission for DM2025/01591.
