Comment Reasons:

Comment: I would like to record my support for application DM2025/01591. The proposal to convert the former ambulance station into a community hub and place of worship is exactly the kind of development this area needs.

The wellbeing sessions, drop-ins, and educational programmes will serve the whole neighbourhood and help build a more connected community. I welcome the fact that this proposal goes beyond faith provision to include a genuine community hub which will benefit my mental health as well as others.

I would also note that nHS England actively promotes social prescribing, and a community hub in the Belmont area would support exactly that. There is strong evidence that community facilities of this kind improve health outcomes by reducing social isolation and providing access to wellbeing programmes.

There is simply nothing like this currently available in the Belmont area. This proposal would change that. Residents who want to access community or faith facilities have to travel to Sutton town centre or further.

On this point, I find it odd that some objectors are concerned about the impact of a community facility when the previous use was a full-time ambulance station with sirens, heavy vehicles, and overnight operations. The proposed use is quieter, less disruptive, and operates within defined hours.

Moreover, the building works are limited in scale, the height increase is minimal, and the application includes landscaping and external improvements that will enhance the street scene on Dorset Road. The design is appropriate for a residential area.

I wholeheartedly support this application and ask the Council to grant planning permission. This facility is needed and will be welcomed.
