Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing in support of planning application DM2025/01591. I have reviewed the proposals for the former ambulance station and I believe this change of use will benefit the wider community.

The need for community and faith provision in this part of the borough has been growing for years. This application responds to a real demand with a practical, locally-accessible solution. Existing facilities elsewhere in Sutton are already full.

Furthermore, only around one in eight drives alone. Half of all users are expected to walk. These are remarkably sustainable travel patterns, and they mean the actual parking and traffic impact will be much lower than the raw attendance numbers might suggest.

It is also worth mentioning that the proposed use is clearly policy-supported, the technical evidence is thorough, and the community benefit is substantial. I trust that the Council will assess this application on its planning merits.

Additionally, the environmental assessments submitted with this application show that the development has been planned responsibly. This is a well-rounded application. The Biodiversity Net Gain requirement is met, flood risk has been assessed, and the energy strategy has been considered.

Combined with the reduction in on-site spaces from the ambulance station's 21, the kerbside position actually improves. Residents may not realise that the existing yellow keep-clear lines near

the site entrance, which currently prevent them from parking there, will be removed as part of this development.

This is a good application that will benefit the area. I support it fully and ask the Council to approve it.
