Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: As a local resident living one road away from the site, this proposal directly affects me and my family. Having reviewed the plans, I genuinely believe this development will be a positive and valuable addition to our area and I will outline why.

This isn't just a mosque. There will be health and wellbeing programmes, community activities, dedicated spaces for women and educational opportunities for children. These are meaningful services that support families and encourage positive engagement whilst fostering a stronger sense of community. Facilities that bring the community together.

I also appreciate that consideration has been given to practical matters. The provision of onsite parking, disabled bays, cycle racks, the retention of greenery, and the decision to stagger Friday prayers around school pickup times all demonstrate a thoughtful and responsible approach which we are very grateful for.

As someone living very close to the site, I know this proposal won't result in significant traffic, noise, or light disturbance. I believe it will instead strengthen the local community and serve as a positive presence in the area.

I respectfully and sincerely ask the Council to approve this application.
