Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I object the building of a place of worship and community hub for the following reasons:

1) Traffic, Parking and Road Safety

The area already experiences severe parking congestion and traffic problems, particularly during school drop-off and pick-up times. The site is immediately adjacent to a primary school, and additional visitors would significantly increase vehicle movements on narrow residential roads, creating safety risks for pupils and parents.

A further place of worship would inevitably worsen congestion and road safety concerns. The surrounding roads both sides of the A217 during worship times are already extremely problematic, with worshippers parking indiscriminately and causing ongoing disruption to residents. Approving another large gathering space in this already constrained area would inevitably intensify these issues.

2) Impact on Vulnerable Residents

A care home is located directly opposite the proposed site. Increased traffic, gatherings and potential noise would materially harm the wellbeing of vulnerable residents and reduce residential amenity for neighbouring households.

3) Lack of Demonstrated Need

There are already several places of worship serving the Sutton area, including an existing community hub at St. John's Church. The application does not clearly demonstrate why an additional facility is required at this constrained residential location.

4) Harm to Residential Character

This is a quiet residential area already under pressure from school-related traffic. The proposal would intensify activity, increase disturbance and fundamentally change the character of the neighbourhood.

The area's infrastructure is already operating at or beyond capacity, and further development of this scale is inappropriate.

For these reasons, I respectfully request that the application be refused.
