

Comments for Planning Application DM2025/01591

Application Summary

Application Number: DM2025/01591

Address: Ambulance Station Dorset Road Belmont SM2 6JH

Proposal: Change of use from Sui Generis (Ambulance Station) to mixed use Classes F1 (Places of Worship) and F2 (Community Hub) involving the erection of a part one, part two storey front and side extension, increase in height to part of building and provision of cycle and refuse stores.

Case Officer: Polly Davidson

Customer Details

Name: Mrs Patricia Smith

Address: 15 Avenue Road Belmont SM2 6JE

Comment Details

Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Irrespective of the premises usage, the onsite parking provision of 10/12 car spaces seems totally disproportionate for the volume of attendees [maximum quoted figure of 250 for Friday prayer sessions with up to 70 vehicles needing on-street parking during peak periods]

The area in the immediate vicinity of the site is primarily residential and is already severely impacted by high volumes of traffic during school drop off and pick up times; parking on yellow lines, across drives {and even on drives } is commonplace and there will be an inevitable clash with the Friday prayer sessions as school traffic is "staggered" during the day

The Planning Application and Travel documents mention that

- a) the application "will reduce pressure on over capacity religious centres elsewhere in the borough" - will this impact on the maximum figure of 250 and 70 vehicles on-road parking?
- b) the modal analysis indicates 50% on foot and 47% by car {a combination of lone and shared) - this does not support the statement that a significant proportion of current access is on foot
- c) the proposals are intended to serve the local residential area within a 20 minute walking distance and for this reason "public transport accessibility has limited relevance" as the majority of current trips are undertaken on foot {50% is a borderline majority and diminishes the 45% by car}
- d) the public transport accessibility rating of 1A is cited as very poor

For the above reasons I object to this planning application
