Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing in support of planning application DM2025/01591. I have reviewed the proposals for the former ambulance station and I think this change of use will benefit the wider community.

This facility will generate far less car traffic than its attendance numbers might suggest. The cycle storage provided in the application supports sustainable alternatives further. The travel data shows the vast majority of users walk or car-share.

I'd also add that the proposed works are modest: a part one, part two storey extension with a limited height increase to the existing building. There is no new upper floor that would create overlooking or overshadowing. The scheme includes external greening, cycle storage, and improved refuse arrangements, all of which improve the appearance of the site. In the same vein, a 24-hour ambulance station with sirens and heavy vehicles was considerably noisier than a community facility operating within defined hours. The noise report confirms what common sense suggests: this is a quieter use of the site.

The Belmont area currently has very limited community space. This proposal will provide a facility that all residents can use, with a programme of activities designed to be accessible and welcoming to people of all backgrounds and ages.

I am fully behind this application. It is good planning, it meets a real need, and I urge the Council to approve it.
