Comment: Planning Objection to Proposed Prayer and Community Hall Development

To: The Local Planning Authority

Re: Objection to Proposed Prayer and Community Hall Development in Residential Area

Application Reference: DM2025/01591

We, the undersigned residents, wish to formally object to the above planning application on the basis of material planning considerations under UK planning law.

1. Impact on Residential Amenity

The proposed development is located within a predominantly residential area intended to provide a quiet and low-traffic living environment. The scale and nature of a prayer and community hall, including regular gatherings and events, are likely to result in increased noise, disturbance, and general activity levels that would adversely affect neighbouring residential amenity.

This appears contrary to the principles set out in the National Planning Policy Framework (NPPF), which seeks to ensure developments provide a high standard of amenity for existing and future occupants.

2. Traffic Generation and Highway Safety

The proposed use is expected to generate significant additional vehicle movements, particularly

during peak prayer times and community events. This raises concerns regarding:

- Traffic congestion on residential streets
- Insufficient parking provision
- Obstruction to access routes
- Increased risk to pedestrians

These concerns are heightened due to the proximity of a nearby school and an elderly care home, where vulnerable road users are present. The proposal may therefore conflict with local highway safety policies and NPPF guidance promoting safe and suitable access for all users.

3. Impact on Local Infrastructure and Environment

The development may lead to environmental impacts including:

- Increased noise levels
- Deterioration in local air quality due to higher vehicle emissions
- Pressure on existing local infrastructure within a residential setting

Such impacts should be carefully assessed through appropriate transport, environmental, and noise impact assessments in accordance with planning policy requirements.

4. Suitability of Location and Land Use Compatibility

Given the intensity of use associated with a prayer and community hall, the proposed location may be incompatible with the established residential character of the area. Alternative sites within mixed-use or town-centre locations may be more appropriate and consistent with sustainable planning principles encouraged by the NPPF.

Conclusion

Our objection is based solely on material planning considerations, including residential amenity, highway safety, environmental impact, and land-use compatibility. It is not related to the nature of the religious or community activities themselves.

We respectfully request that the Local Planning Authority carefully consider these planning concerns when determining the application.
