Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I seriously object to this proposed development, and I'd strongly urge council to reject this application. Some of the major reasons for my objections are as below:

Increased traffic and Road safety risks around the area. There have been instances of serious accidents at the Dorset Road/Belmont rise traffic signal in the past. Increased vehicular movement on the Dorset road will increase the risk significantly at the junction.

School safety - Avenue primary school pupils count has increased over the years and currently it's already a struggle for parents parking to drop off and pick children. Car parking by parents has even spilled over to near by roads like Burdon lane/Northey Avenue junction. Extra vehicles coming to this new development will have spill over parking on nearby roads including Burdon Lane and also increases accident risks around Burdon lane/Northey Avenue junctions.

Serious noise and late-night disturbance - dispersal of up to 250 people at 11am can mean voices, engines, door slamming, and cars circling for space.

Vulnerable residents - nearby care home and elderly neighbours are hit hardest by obstructing road and late-night disturbance.

Visually overbearing and completely out of character - Proposed extension and increased building height would create a structure that is visually dominant and entirely out of keeping with the domestic scale of neighbouring properties.
