Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I live 350 yards away from the ambulance station as opposed to people who have commented that live miles away.

My main concerns are increased traffic and parking pressure in an already busy street. Holland Ave is already under pressure from the Avenue School in the morning and afternoon. Add the S4 into the equation and the road can come to a standstill. I have even experienced a Mum doing the school run parking on my drive then going to collect her child. The knock on effect is poor road safety/increased noise/congestion. The impact of more people wanting to use the road to park in will be unacceptable, I don't believe that the majority of attendees will be using public transport or walking. I have seen the carnage outside the Church on a Friday during prayer times.

I have read on LBS website that the Council are focused on aiming to be London's 'most sustainable borough with a net-zero carbon future improving air quality by reducing emissions'. This will clearly not be possible if the proposed plans by BSMA are approved.

The barrier in Balmoral Way turns the road into a cul de sac creating difficulty for emergency vehicles due to too many cars attending the site as seen already at St John's Church.

Therefore I feel planning permission should be refused
