Comment Details

Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I want to lodge my vehement objection to this development proposal for the following reasons:

The area is already hugely congested and what is being applied for will without doubt significantly exacerbate this situation.

The increase in traffic will put additional pressure on the already serious lack of parking spaces and add to toxic air pollution.

I have serious concerns about the safety of school children attending the Avenue Primary Academy due to the combination of increased traffic, blocked pavements and parked cars which will hinder the visibility of children crossing roads to drivers.

Elderly and vulnerable residents of the nearby care home as well as others living nearby will find the (particularly late-night & early morning) activities and noise of the proposed development disturbing and stressful.

The extension and building height would create a building completely out of keeping with the residential vicinity. This will also very unfairly & negatively impact the value of properties in the neighbourhood.

I am certain that my objections will be shared by the majority of the presence in this area
