Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: The proposal will place significant unacceptable strains on a quiet residential location. In acquiring the site, the applicant has failed to recognise the extremely small outside space for visitor parking, and seriously limited street parking in the immediate vicinity.

Roads in the area are generally narrow (Avenue Road and Holland Avenue) and there is a traffic barrier on Dorset Road. The community currently uses a nearby church hall for Friday prayers which results in significant parking congestion in Belmont, and this proposal simply transfers the problem to residential streets which are already congested on weekdays by parking related to Avenue Primary Academy, which has over 1,000 students. The S4 bus route is already impacted by this issue on weekdays.

It is not just a case of measuring the available kerb space in nearby roads: this is already stretched to breaking point during school hours, with regular cases of anti-social parking behaviour. Further capacity simply does not exist, and takes no account of the additional air pollution it will produce as a result of poor transport links.

The proposal to increase the building height is questionable in relation to neighbouring structures, as is the accuracy of the anticipated attendance figures at gatherings in the building. There are other mosques within easy reach of this location, which is not suitable for such a development.
