Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: My objections are as follows

1. Traffic Disruption caused by increased traffic for both the school traffic and bus traffic .
2. Increased noise disruption for local residents and especially the local care homes caused by the anticipated increase of visitors to the area. This will be especially disruptive in the evenings as we currently live in a quiet residential area.
3. School safety - there are many children and parents walking to the Avenue school and an increase in traffic would severely increase risk of accidents and their safety.
4. Parking - as a local resident I am very concerned about the potential increase in parked cars on my road by the visitors to the mosque . We already have issues during school hours and this already causes us a problem and this would be increased by more visitors. Also this is a bus route so the parking already causes a problem as all the roads here are narrow residential roads.
5. I am concerned that the proposed extension and increased height would create a structure that is out of character with the local residential surroundings and in particular would become visually dominant .

Overall I am very concerned that these disruptions would not be restricted to just Fridays but would become the everyday norm as the proposal is for a mosque and community centre that would be open every day .
