Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: Sutton has a significant and growing Muslim population who currently have limited dedicated space for worship. Like churches, a mosque provides a recognised place for religious practice, community support, and education. Equal access to places of worship is part of a fair and inclusive society.

A mosque is not only a place of prayer. It can serve as a hub for charitable work, youth engagement, educational programmes, and interfaith dialogue - all of which strengthen community cohesion and benefit the wider Sutton community.

Members of the Muslim community have been attending St John's Church for religious activities for several years, which is located very close to the proposed site. This indicates that worship-related footfall already exists in the area. A purpose-built facility would not introduce a new population to the area, but rather provide appropriate accommodation for an existing one.

It is important that they are provided with a suitable and permanent place of worship.
