Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I strongly object to this application on highway safety, parking, residential amenity and design grounds.

The surrounding roads are already heavily congested, particularly during school drop-off and pick-up times at Avenue Primary School. Parking regularly overflows into nearby roads including Burdon Lane and Northey Avenue, and buses experience obstruction. The Dorset Road/Belmont Rise junction has a history of accidents and cannot safely accommodate a significant increase in vehicle movements.

The proposed building would attract a large number of attendees arriving and leaving within short time periods. The lack of adequate on-site parking is likely to result in overflow parking on residential streets, increasing congestion, reducing visibility at junctions, and creating additional risks for pedestrians - particularly school children.

There is also concern about noise and disturbance from vehicle movements and dispersal, especially in the evening, which would harm the amenity of neighbouring residents and nearby care facilities.

In addition, the proposed extension and increased height appear out of keeping with the residential character of the area and would create a visually dominant structure in a domestic setting.

For these reasons, the proposal would have an unacceptable impact on highway safety,

residential amenity and local character, and planning permission should be refused.
