Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I formally object to this application on the following material planning grounds:

1. Highways and Parking (NPPF 2023, Para. 115)

The site provides only 14 on-site spaces against peak surges of 250 persons, with 69 vehicles already displacing onto surrounding streets. This ratio represents a severe and demonstrable impact on the local road network, meeting the NPPF threshold for refusal on highway grounds. A full Transport Assessment and Travel Plan have not been submitted, without which the LPA cannot lawfully make an informed determination. The statutory Highway Authority consultee should be asked to formally assess and report on this deficiency.

2. Child Safety (NPPF Para. 100) m a nearby school means that overflow parking of up to 69 vehicles on surrounding streets will reduce sightlines and visibility for children and families. The NPPF requires particular priority to be given to vulnerable road users, including children. No road safety assessment addressing this risk has been submitted.

3. Late-Night Noise and Amenity (NPPF Para. 191; Noise Policy Statement for England 2010): Regular dispersal of up to 250 people at approximately 11:00 PM, with associated vehicle movements and noise, constitutes a serious and recurring amenity harm in a residential setting. No Noise Impact Assessment or Management Plan has been submitted. Conditions cannot adequately address what is a fundamental and foreseeable pattern of harm.

4. Vulnerable Residents (NPPF Chapter 8): A nearby care home houses residents with heightened sensitivity to noise and disturbance. Late-night dispersal, headlight intrusion, and vehicle noise will

directly harm their amenity and wellbeing. This has not been addressed in the application.

5. Cumulative Highway Impact (NPPF Para. 115): The surrounding road network already serves multiple venues. Overlapping peak periods will compound congestion and parking displacement beyond what any individual use generates alone. No cumulative impact assessment has been provided, rendering the application materially incomplete.

The unaddressed impacts go directly to the LPA's statutory obligations on highway safety, amenity, and the protection of vulnerable residents.
