Appendices

Appendix A - Travel Survey Data

1 INTRODUCTION

- 1.1 This Travel Plan has been prepared by Caneparo Associates on behalf of The Belmont and Sutton Muslim Assembly (BASMA) ('the Applicant') to provide traffic and transportation advice with regard to the proposals at Sutton Ambulance Station, SM2 6JH ('the site') in the London Borough of Sutton ('LBS').
- 1.2 The proposal comprises the redevelopment of the site to provide a circa 294.5 sqm GIA multi-purpose community centre (the 'BASMA Community Centre') which will be used as a place of worship and as the hub for a range of activities such as sports, gardening and a youth club. The proposals will be accompanied by car & cycle parking in addition to waste storage.
- 1.3 This Travel Plan has been written to encourage users of the site to travel by more sustainable modes of travel and reduce the need for private vehicle use. The Travel Plan sets out measures and initiatives which target the main Aims and Objectives which are to:
1. Help reduce the impact of transport on the local environment and increase the awareness of sustainable travel access (through promoting and marketing initiatives for car share, walking, cycling, bus travel to all users of the site.
 2. Include measures to encourage and monitor an increase of travel choice to the site, and reduce the dependency on the car (particularly for journeys under 5km by single occupancy users) through promoting measures that discourage unnecessary car use for all users of the site over a given time.
 3. Discourage irresponsible on and off-site parking for all users of a site through adopting a strategy to manage parking, limit inconvenience to local residents and reduce the risk of accidents.

Travel Plan Aim

- 1.4 The aim of this Travel Plan is to put in place the management tools that are necessary to enable staff and visitors to make informed decisions about their travel to the site. This will in effect minimise the adverse impacts of their travel to / from the site on the environment. This aim is achieved by setting out a strategy for eliminating barriers which keep employees and visitors from making use of sustainable, and in particular, active modes.

Site Location

- 1.5 The site is located on the northern side of Dorset Road, with Belmont Station located circa 800m / 10-minute walk to the southeast of the site. A site location plan is shown in **Figure 2.1** below.

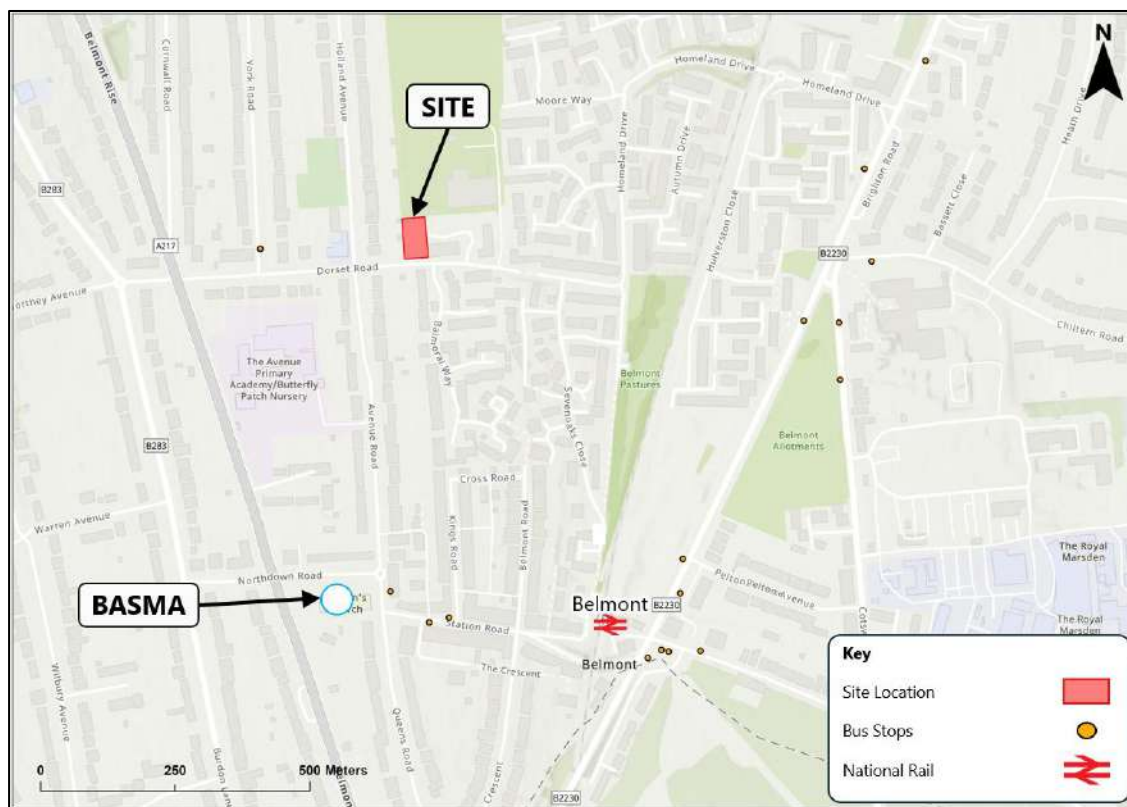

Figure 2.1: Site Location Plan

Source: ArcGIS Pro 2025

Travel Plan Benefits

- 1.6 The achievement of the objectives of the Travel Plan will bring about benefits at the following levels:
- Staff – through improved health, reduced stress and potential cost savings;
 - Visitors – improved health, reduced stress and a stronger sense of community; and,
 - The community – by the development demonstrating its commitment to encouraging active travel and promoting car sharing.

Travel Plan Scope

- 1.7 This Travel Plan acts as an overarching document which will encompass all staff and visitors within the Development, directed at encouraging sustainable travel to both staff and visitors. This includes staff at all levels. The initial targets set out in the Travel Plan are based on travel surveys

of visitors and staff. Updated annual travel surveys will be included for the lifetime of the Travel Plan.

This Document

1.8 This Travel Plan has been written as a stand-alone document and contains all the relevant information needed to effectively implement and monitor the Travel Plan.

1.9 The remainder of this document is structured as follows:

- Section 2 - Outlines accessibility and travel patterns;
- Section 3 - Sets out the objectives and targets of the Travel Plan;
- Section 4 - Provides the Travel Plan strategy;
- Section 5 - Identifies the measures that will be implemented;
- Section 6 - Summarises the monitoring and review programme; and
- Section 7 - The Action Plan.

2 ACCESSIBILITY AND TRAVEL PATTERNS

- 2.1 The Site is accessible by all modes with a network of footpaths, cycle facilities and public transport services in the vicinity.

Accessibility

- 2.2 The site is accessible by non-car modes being within walking and cycling distance of public transport services. As such, there is a range of opportunities for visitors of the site to use modes other than the private car.

Active Modes

Walking

- 2.3 At the frontage of the site, Dorset Road has pavement circa 1.5m in width, which accommodates pedestrian movement to and from the site. Approximately 50m / 1-minute walk west from the site access is a raised table junction with decreased lane width adjacent to the junction to encourage vehicle drivers to lower their speed at this junction, therefore creating a safer pedestrian environment.
- 2.4 Transport for London's (TfL's) Healthy Streets research states that 'if every Londoner walked or cycled for 20 minutes a day, it would save the NHS £1.7bn in treatment costs over the next 25 years', therefore the range of facilities within the 20-minute walking and cycling zone of the site will encourage future users of the site to achieve this target.
- 2.5 The 20-minute walking zone is shown at **Figure 2.1** which covers a large residential surrounding catchment from which the vast majority of visitors are likely to travel in the future.

Figure 2.1: 20-minute Walking Isochrone

Source: ArcGIS Pro 2025

2.6

Table 2.1 below presents a list of public transport and local amenities within walking distance of the site, with walking speeds of 80m per minute assumed. All distances are measured from the centre of the site.

Table 2.1: Approximate Distances to Public Transport / Local Amenities			
Amenity	Location	Distance (metres)	Approximate Walking Time
Public Transport Opportunities			
Bus Stops	York Road / Dorset Road	220m	3 minutes
	Belmont / Station Road (Westbound)	530m	7 minutes
	Belmont / Station Road (Eastbound)	550m	7 minutes
	Belmont Station / Station Road (Stop A)	770m	10 minutes
	Belmont Station / Station Road (Stop A)	800m	10 minutes
National Rail	Belmont Station	680m	8-9 minutes
	Cheam Station	1.5km	19 minutes
Local Amenities			
Downs Lawn Tennis Club	Holland Avenue	210m	3 minutes
Sutton Bowling Club	Bowling Way	370m	5 minutes

Table 2.1: Approximate Distances to Public Transport / Local Amenities

Amenity	Location	Distance (metres)	Approximate Walking Time
Hopscotch Day Nursery	Avenue Road	420m	5 minutes
St John's Community Hall (current location of BASMA)	Northdown Road	490m	6 minutes
Belmont GP Centre	Hardegray Close	570m	7 minutes
Jesmund Nursing Home	York Road	720m	9 minutes
Pine Dental	Station Approach	770m	10 minutes
Overton Park	Overton Road	820m	10 minutes
Hashmees Convenience Store	Rookley Close	970m	12 minutes
Shanklin Community Hall including Children's Centre	Rookley Close	1km	12-13 minutes
Belmont Park	Brighton Road	1km	12-13 minutes
Cheam Fields Sports Club	Devon Road	1.2km	15 minutes
Mulgrave Road Pharmacy	Upper Mulgrave Road	1.3km	16 minutes
Royal Marsden Hospital	Downs Road	1.3km	16 minutes
Overton Grange School	Stanley Road	1.5km	19 minutes

Cycling

- 2.7 Within the Healthy Streets guidance, TfL defines a 20-minute cycle as a suitable distance for visitors to travel to / from the site by bicycle. A 20-minute cycling isochrone around the site has been included in **Figure 2.2** below along with the local TfL cycleway network.
- 2.8 Within a 20-minute cycling distance from the site, several areas including Croydon, Wallington, Morden, Mitcham, Epsom and Sutton – in addition to many public transport nodes.

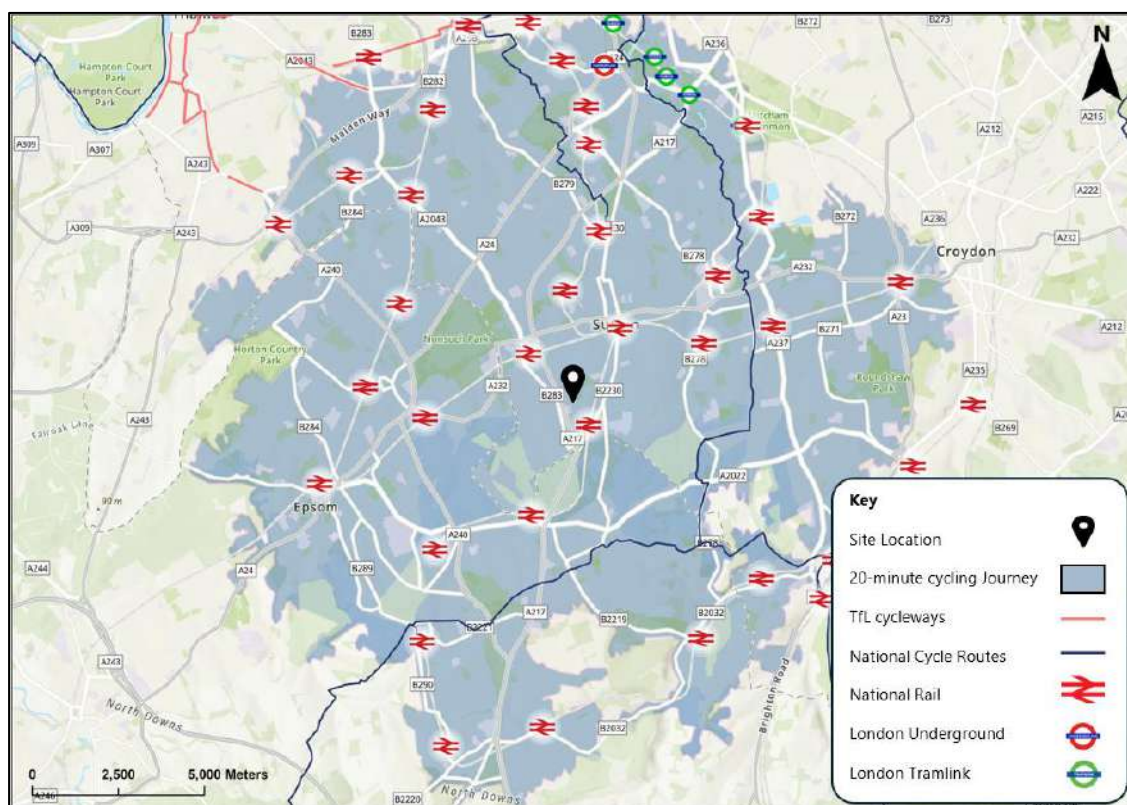

Figure 2.2: 20-minute Cycle Isochrone

Source: ArcGIS Pro 2025

- 2.9 The closest marked cycle route to the site is National Cycle Route (NCR) 20, approximately 3.2km (13-minute cycle) east of the site. NCR 20 connects London to Brighton starting in the north at the River Thames in Wandsworth. NCR 22 is also accessible, approximately 3.5km (14-minute cycle) south of the site, with this route operating from Banstead via Dorking, Guildford, Farnham and Portsmouth to Brockenhurst in the New Forest via Dorking, Guildford, Farnham and Portsmouth.
- 2.10 Along with official cycle routing, the site is close to several quiet streets and roads, which offer further connections for cyclists. Approximately 180m / 1-minute cycle west of the site there is a cycle gate, which only permits through access onto Thrasted Close for cyclists and emergency vehicles (via a gated access). The presence of this cycle gate limits vehicle traffic in the local area, therefore making local roads safer for cyclists.

Public Transport

Public Transport Accessibility Level (PTAL) Rating

- 2.11 Public Transport Accessibility Levels (PTALs) are a theoretical measure of the accessibility of a given point to the public transport network, taking into account walk access time and service availability.

- 2.12 The PTAL is categorised in six levels, 1 to 6 where 6 represents an excellent level of accessibility and 1 a poor level of accessibility. It is then further sub-sectioned into 'a' and 'b', with 'a' being at the lower end of the spectrum and 'b' at the higher.
- 2.13 The PTAL rating of the centre of the site is 1a, suggesting the site has a 'very poor' level of accessibility to public transport. It is noted that the PTAL calculation report does not include the S2 and S4 bus services despite their good proximity to the site – whilst the distance to Belmont National Rail Station is also overstated by circa 185m or an additional 2-minute walk.
- 2.14 It is important to note that the proposals are intended to serve the local residential, with numerous properties within a 20-minute walking distance (as illustrated at **Figure 2.2** above). On this basis, it is considered that public transport accessibility has limited relevance, since as with the existing BASMA centre, the majority of trips are expected to be undertaken on foot.

Bus Services

- 2.15 The nearest bus stops to the site are located approximately 220m (3-minute walk) west, 530-550m (7-minute walk) south and 820m (10-minute walk) southeast. These bus stops provide services S2, S4 and 280 respectively.
- 2.16 It is noted routes S2 and S4 also operating as 'hail and ride' between stops, with it possible to access route S2 from the junction of Dorset Road and York Road (circa 190m / 2-minute walk from the site) and route S4 from the junction of Dorset Road and Holland Avenue (circa 90m / 1-minute walk from the site).
- 2.17 The Belmont Station / Brighton Road bus stop provides sheltered seating and timetable information. The York Road / Dorset Road bus stop comprises a flagpole with timetable information. The Belmont / Station Road (eastbound and westbound) bus stops provide a bus flag. The Belmont Station / Station Road bus stops 'A' and 'B' comprise sheltered seating with timetable information.
- 2.18 Bus services in the vicinity of the site are summarised in **Table 2.2** below.

Table 2.2: Summary of Bus Services				
No.	Route	Frequency (Every 'X' Minutes)		
		Mon-Fri	Saturday	Sunday
280	St George's Hospital – Tooting Broadway Station – Mitcham Tram Stop – Sutton Police Station- Sutton Hospital - Belmont/Brighton Road	8-12	8-12	11-13
S2	Epsom – Ewell – Cheam – Belmont – Sutton – St Helier Hospital – Rose Hill – St Helier Station	19-20	20-21	29-30
S4	Waddon Marsh Sainsbury's – Therapia Lane Tram Stop – Beddington / Asda – St Elphege's School - Sutton/Marshall's Road	20-21	19-20	30-32

- 2.19 It is also pertinent to note that the entirety of the London Bus network can be used by disabled users, owing to all buses containing a ramp and being low-floor accessible vehicles. In addition, all London buses are equipped with the 'iBus' system which provides audio / visual updates to passengers regarding route and stop information.

National Rail Services

- 2.20 The closest station to the site is Belmont National Rail Station which is located circa 680m southeast of the site (8-9 minutes' walk). Belmont National Rail Station is operated by Southern with the station offering access to 4 services per hour during the AM peak hour, with the being 2 services per hour to Epsom Downs and 2 services per hour to London Victoria. Trains to London Victoria take approximately 56 minutes.
- 2.21 Belmont National Rail Station has step free access to all platforms. There is tactile paving on all platforms and ramps available for alighting the train. The station also has cycle parking for up to 10 cycles.

Travel Surveys

Modal Split Data

- 2.22 Travel surveys have been conducted by BASMA in April 2025 for Friday Prayers to determine the modal split for Friday Prayer users at the current site, which operates out of St John's Community Hall.
- 2.23 It is noted that St John's Community Hall which is located just circa 480m / 6-minute walk south of the site and as such, it is considered that the surveyed modal split could be used as a baseline for the expected travel patterns of users at the proposed site.

2.24 The modal split for the existing BASMA location is detailed in **Table 2.4** below, with surveyed data attached **Appendix A**.

Table 2.4: Modal Split – Friday Prayers	
Mode	Census 2011 Modal Split (%)
Underground	0.0%
Train	0.0%
Bus	1.7%
Taxi	0.8%
Motorcycle	0.0%
Drive Alone	11.7%
Car Share (Driver)	20.0%
Car Share (Passenger)	14.2%
Bicycle	1.7%
On Foot	50.0%
Total	100.0%

2.25 The modal split surveys show that the majority of travel to the existing site is made using active or sustainable modes (53.4% of trips). In addition, there is a significant amount of car sharing already taking place, with 34.2% of surveyed visitors to the site either being the driver or a passenger in a car share.

Postcode Data

2.26 Residential postcode data was also collected in the survey, which has been plotted in **Figure 2.3** below. This shows that the vast majority of people live within a 20-minute walk of the site. It is noted that two respondents located near Brixton and Kensal Green have been excluded from the ArcGIS map.

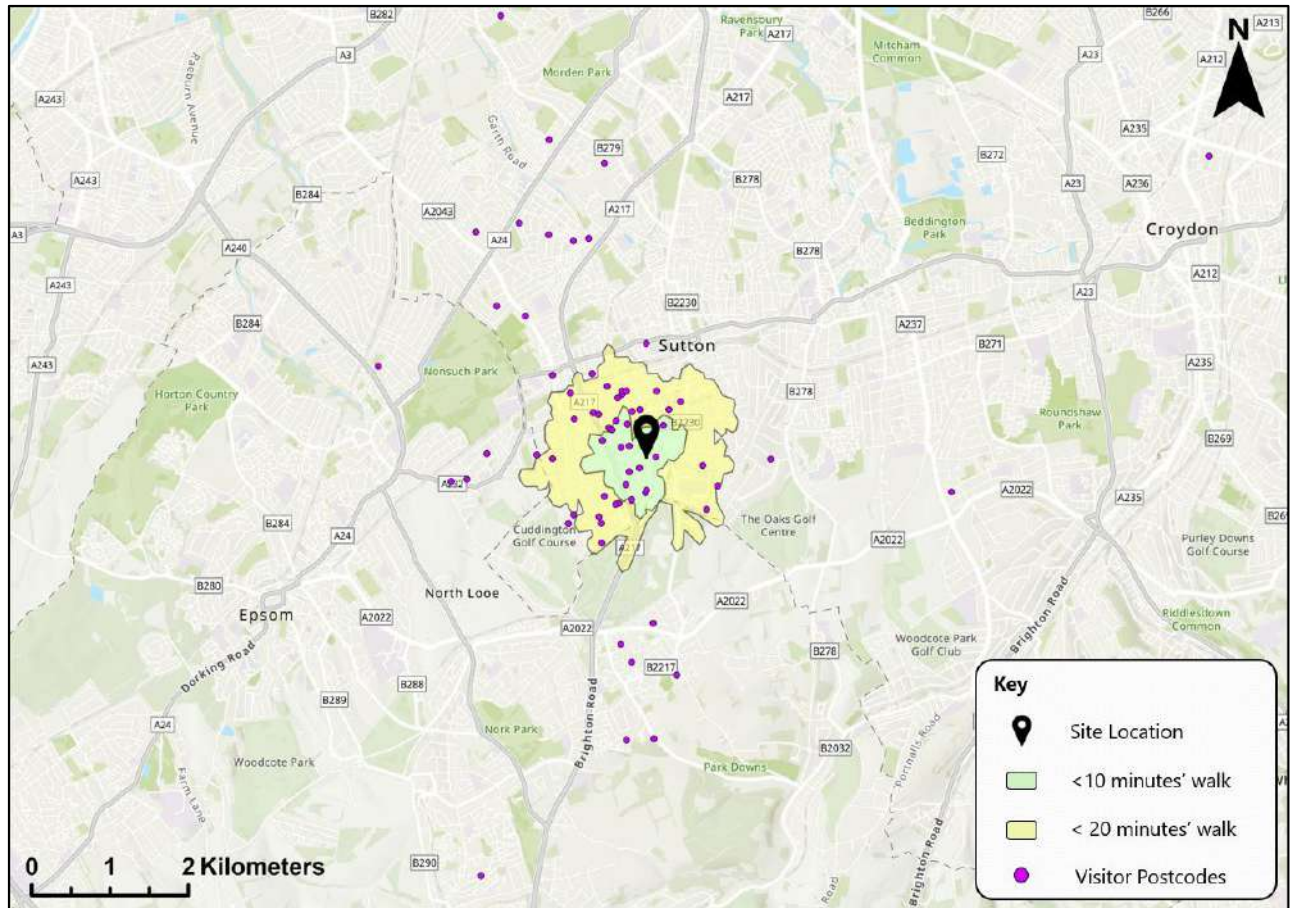

Figure 2.3: Existing Postcode Locations (Expanded Version)

Source: ArcGIS Pro 2025

2.27 A zoomed in version of the above is provided at **Figure 2.4** below, showing more clearly the amount of people who live within a 10-minute / 800m and 20-minute / 1.6km walk of the site.

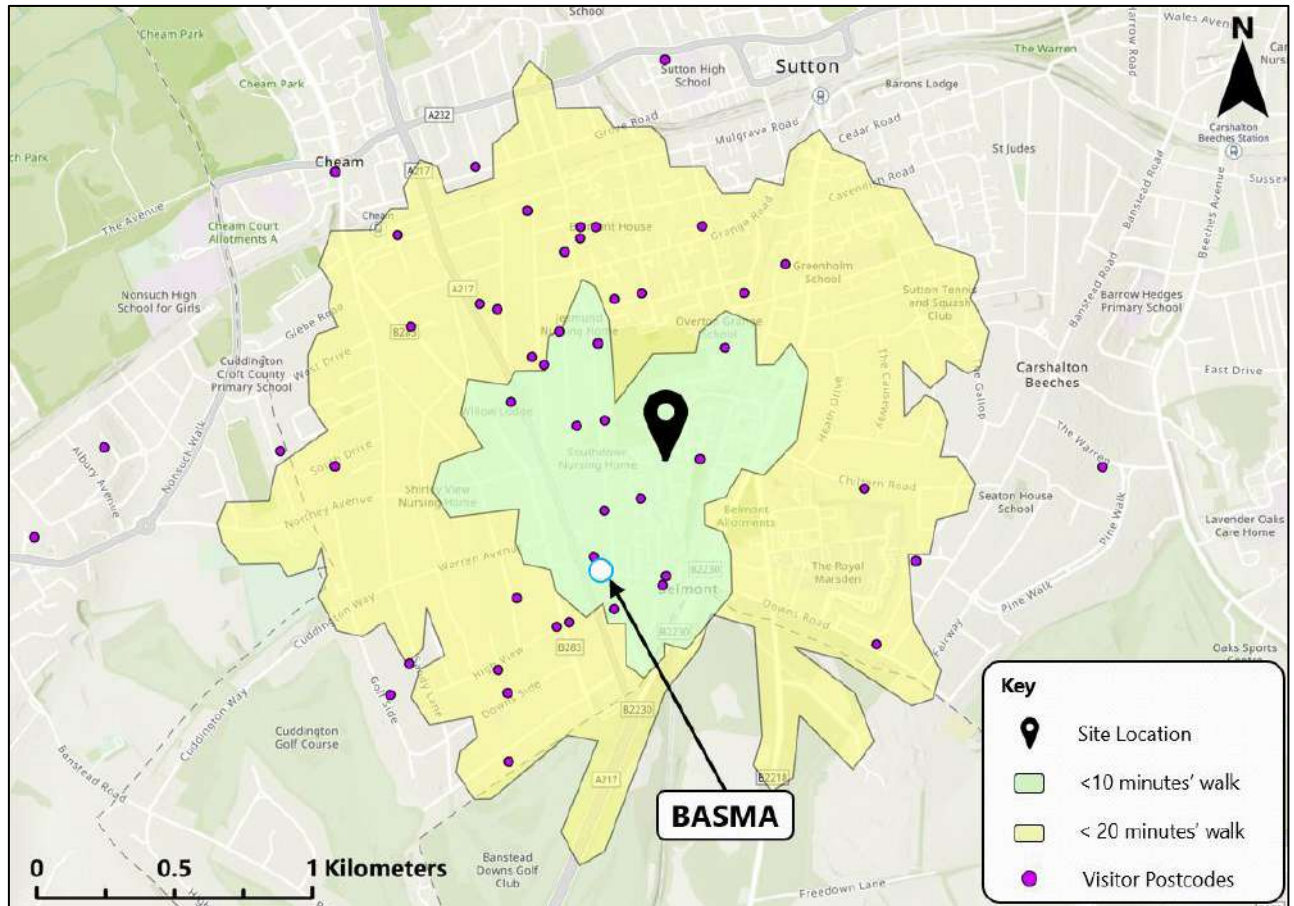

Figure 2.4: Existing Postcode Locations (Zoomed Version)

Source: ArcGIS Pro 2025

3 OBJECTIVES AND TARGETS

Introduction

3.1 This section sets out the overarching objectives for the Travel Plan, as well as targets for the short and medium term. It includes indicators through which progress towards meeting the targets will be measured. Further information on monitoring and review of the Travel Plan can be found in **Chapter 6**.

- **Objectives** are the high-level aims of the Travel Plan. They help to give the Travel Plan direction and provide a clear focus.
- **Targets** are the measurable goals by which progress will be assessed. The Travel Plan sets out targets which the site will seek to reach within the period covered by this Travel Plan.

Objectives

3.2 The Travel Plan's overriding objective is:

To engage with and encourage visitors and staff to use more sustainable ways of travelling to / from the development through more effective promotion of public transport services, and particularly, active modes. This will reduce the number of visitors attending by car and by proxy minimise the impact of the development on the local highway network

3.3 The sub-objectives are as follows:

- **Sub-objective 1:** To increase visitor and staff awareness of the advantages and availability of sustainable / active modes of transport to access the development;
- **Sub-objective 2:** To promote the health and fitness benefits of active travel to all visitors and employees;
- **Sub-objective 3:** To introduce a package of physical and management measures that will facilitate visitor and staff travel by sustainable modes and restrict travel by private car; and therefore,
- **Sub-objective 4:** To reduce unnecessary use of the private car for the journey to and from the development by visitors and staff.

Targets

- 3.4 Targets are measurable goals by which the progress of the travel plan will be assessed. Targets are essential for monitoring progress and success of the travel plan. Targets should be 'SMART' – Specific, Measurable, Achievable, Realistic and Time-related.
- 3.5 Targets come in two forms – Action and Aim Targets. Action Targets are non-quantifiable actions that need to be achieved by a certain time, while Aim Targets are quantifiable and generally relate to the degree of modal shift the plan is seeking to achieve.

Action Targets

- 3.6 The key Action targets are set out below:
- To appoint a Travel Plan Coordinator (TPC) at least 3 months prior to Occupation of the Development.
 - To launch this Travel Plan on the Occupation.
 - Each monitoring survey will occur within one month of the anniversary of the baseline survey in each survey year (i.e. Years 0, 1, 3 and 5).
 - A sustainable transport noticeboard / plasma screen will be provided in a prominent location. The information will be periodically updated so that it details up-to-date information.

Aim Targets

- 3.7 The Aim targets of this Travel Plan are focused on visitors and staff, however private vehicle reduction numbers apply only to visitors as only the Imam and Community Centre Manager will be permitted to park on-site (alongside those with mobility impairments).
- 3.8 TfL's Travel Planning Guidance outlines "London wide" targets, as set out in the Mayor's Transport Strategy, to promote a mode shift towards walking and cycling over and above public transport use.
- 3.9 **Table 3.1** and **Table 3.2** outline the Aim Targets set out for the site, based on the busiest prayer service (Friday) and community use (weekend). The targets are set to measure progress towards the main objectives over five years. These targets are to be achieved within five years of the launch of the Travel Plan.

3.10 The baseline figures are taken from the existing mode split, as detailed in Section 2. This Travel Plan recognises that it is not possible to set out accurate targets far in the future. As such, it should be acknowledged that the targets may change over time as results from on-going monitoring become available.

Table 3.1: Mode Share Targets				
Targets	Interim Targets			
	Year 0	Year 1	Year 3	Year 5
To reduce the percentage of visitors who use the drive alone / car share (driver) mode share by 7.5%	31.7%	30.2%	27.2%	24.2%
To reduce the percentage of visitors who use the car passenger mode share by 2.5%	14.2%	13.7%	12.7%	11.7%
To increase the percentage of visitors who use active and sustainable modes to access the site by 10%	53.4%	55.4%	59.4%	63.4%

3.11 Indicators are the elements which will be measured in order to assess progress towards meeting the targets. For the most part, this will be the main mode listed by visitors and staff in the monitoring surveys conducted in years 0, 1, 3 and 5.

4 TRAVEL PLAN STRATEGY

Travel Plan Coordinator

- 4.1 The BASMA board will appoint a Travel Plan Coordinator ahead of the site receiving consent. The role of Travel Plan Coordinator for the site will be taken up by a member of Site Management and provided within the final version:

Name: TBC

Email: TBC

Tel: TBC

Mobile: TBC

- 4.2 The TPC has access to the appropriate technology and resources necessary to communicate effectively with visitors, staff and stakeholders using a variety of mediums and is a prominent figure within the visitors community.

- 4.3 The duties of the TPC include:

- Undertake Travel Surveys at years 0, 1, 3 and 5;
- Take responsibility for data collection and review of the Travel Plan;
- Oversee the development and implementation of the Travel Plan on a day-to-day basis;
- Obtain and maintain commitment and support from worshippers, other visitors, staff, etc.;
- Design and implement effective marketing and awareness-raising campaigns to promote the Travel Plan;
- Act as a point of contact for all staff and visitors requiring information;
- Act as a point of contact for residents for any concerns regarding the site's operations; and,
- Ensure the travel information available is always up to date.

Time Allocation

- 4.4 The TPC will undertake the management of the Travel Plan in addition to their normal duties. The person undertaking the role will be allowed the time necessary to enable this Travel Plan to achieve its objectives.

Marketing Strategy

- 4.5 All staff/volunteers, as well as visitors will be made aware of the existence of the Travel Plan. The details of the Travel Plan, its objectives in enhancing the environment and the role of individuals in achieving the objectives of the Travel Plan will be explained. Visitors will be made aware of the Travel Plan primarily by noticeboards to be erected in key communal areas where all visitors can see them, alongside during classes or when attending prayer.
- 4.6 Contact details of the TPC will be advertised in the event that staff or visitors wish to discuss specific matters directly. Further to this, the TPC will directly make themselves known to all staff and visitors at the building in order to provide regular updates on the local transport network, but also to promote sustainability events.

Funding

- 4.7 All necessary funding required for the travel surveys plus the measures and initiatives of the Travel Plan will be made available to the Travel Plan Coordinator, to ensure the Travel Plan is fulfilled.

5 MEASURES AND INITIATIVES

Introduction

- 5.1 This section of the Travel Plan outlines the specific physical and management measures to be implemented as part of the Travel Plan. The implementation of the listed measures forms the core of the Travel Plan and includes awareness initiatives and infrastructure provision.
- 5.2 The list of measures described is by no means exhaustive and it will be the responsibility of the appointed TPC to investigate other potential measures. It is important to add that in the longer-term other measures may be more suitable for the users depending on their needs and demands. This will be evident from the proposed regular monitoring results and measures will be implemented and/or altered accordingly.
- 5.3 As set out in Section 4 of this report a key target will be to reduce the private car / passenger mode shares by 10.0% over 5 years.

General Measures

Hard / Physical Measures

- 5.4 It is recognised that physical aspects of the Development can influence travel patterns and will have an impact upon the mode and extent of use of sustainable transport from the outset. The measures that have been incorporated into the Development are set out below.

Cycle Parking

- 5.5 The proposals require 1 long-stay and 4 short-stay cycle parking spaces in accordance with the London Plan 2021 requirements for the 'D1 other (e.g. library, church, etc.)' standards, when assuming that the site has 8 FTE (full time equivalent) staff.
- 5.6 A total of 8 cycle parking spaces are proposed at the site, which represents a overprovision which accords with the Applicant's desire to encourage users of the site to access the site using active modes. All cycle parking spaces are secure and covered.

Active Modes Initiatives

Walking

- 5.7 Walking is a truly sustainable method of travel which offers staff and visitors predictable journey times and a range of physical and psychological benefits.
- 5.8 The TPC will develop marketing materials to highlight the health benefits of walking and will implement the following measures to encourage walking:
- Staff and visitors will be provided with information and advice concerning safe pedestrian routes to / from the site;
 - The TPC will ensure walking promotional leaflets are provided at the noticeboard for staff and visitors to view;
 - Organisation of social cycling and walking events, e.g. lunch time or after worship walks; and,
 - Health benefits of walking to be promoted e.g. '10,000 steps a day campaign'.
- 5.9 Staff and visitors will be discouraged from driving to the site with sustainable modes of transport encouraged wherever possible.
- 5.10 A case study will be set up on the notice board of regular attendees who walk to the site. The case study will highlight how healthy they feel, the money saved and the time it takes to walk in. Campaigns such as 'Walking Week' or 'Make a pledge' will be undertaken by devotees undertaking a Walking Diary.

Cycling

- 5.11 Cycling is a healthy, low cost, environmentally friendly way to travel and keep fit.
- 5.12 Specific cycle promotions will include the following:
- Promotion of the health benefits of cycling;
 - Promotion of cycle events such as RideLondon and the London to Brighton cycle ride;
 - Cycle routes and other cycling information provided on notice boards; and,
 - Setting up a Bicycle User Group or similar, if demand warrants.

- 5.13 The TPC will organise for cycle repair workshops (e.g. Dr Bike) to be held on the site in addition to cycle training, should demand require. Additionally, the TPC will look into setting up a possible 'breakfast club' / meeting point for cycle groups. It is also noted that the kitchen is located next to the multi-function entrance / office, so water, teas and coffees can easily be served to cyclists.
- 5.14 All the details mentioned will be available on the notice board and on the website with all users of the site having access to these resources. The site will look at setting up a case study of regular cycle users to the site to highlight the ease and time of making a cycle journey and the amount of money saved undertaking a cycle journey. This will aid in promoting the benefits of using a bicycle.

Public Transport Initiatives

- 5.15 Up-to-date details of bus and rail services, including route information and service frequencies, will be permanently on display in prominent locations via the plasma screens located within the building. National Rail and TfL Journey Planner websites and enquiry phone numbers will also be promoted to staff and visitors through all relevant means.
- 5.16 The TPC will work with LBS and public transport operators to improve routes if an issue or problem arises.

Noticeboards

- 5.17 Within the site a plasma screen and / or noticeboard will be provided in a prominent location, providing up-to-date information about public transport and active travel that will be updated by the Site Management Team (SMT) periodically. It will also include details of the Travel Plan itself and the contact details of the TPC.
- 5.18 The noticeboards will include leaflets which will promote the health benefits of walking and cycling, as well as promoting the use of local buses. The noticeboards will also include a map which will show key amenities, cycling and walking routes as well as bus stop locations to promote the use of more sustainable modes of travel to those who arrive by car.
- 5.19 The Travel Noticeboard will include details of the following:
- A list of free to use route planners (walking, cycling, public transport, car share etc);
 - Ready references to use the route planners;

- A list of other free to use websites which assist use of sustainable travel options to the site;
- Information on where cycle parking is located;
- A breakdown of the aims and objectives of the Travel Plan for the site;
- A list of nearby cycle shops;
- A cycle map and pedestrian map to cover the site;
- Guidelines to use smartphones to find out when the next bus / Elizabeth Line services are due to arrive/leave the site; and,
- Details of a carbon calculator/cost calculator to compare different journeys made to the site:
 1. Calorie calculator:
<http://www.eatwell.gov.uk/healthydiet/healthyweight/caloriecalculator/>
 2. Carbon Calculator: <http://actonco2.direct.gov.uk/index.html>
 3. Real Car Costs: <http://www.pricextra.com/cars/index.php>
 4. Eco calculator: www.getecommanager.com
 5. Carbon calculator:
http://www.economicalenvironmentalist.co.uk/index.php?p=1_4_Calculator

Staff Measures and Initiatives

Induction Sessions

- 5.20 All staff / volunteers will be provided with an Induction Session to the aims and objectives of the 'overarching' Travel Plan at the time of completion of the Travel Plan going live by the TPC.
- 5.21 An Induction Session will be made available to all employees, volunteers and to visitors via the website and through the TPC covering the topics. All sustainable modes of travel will be promoted, in particular active travel modes. The site is committed to promoting a healthy lifestyle for all its attendees, and for this reason active travel will be the focus for travel promotion where possible for visitors.
- 5.22 The Induction Session will go through; the aims and objectives of the Travel Plan, easy to use guides to using sustainable journey planners and talk through the items within the induction pack.
- 5.23 The Induction Session will also consist of undertaking procedures for identification of emergency exits, emergency fire evacuation procedures, health and safety, contact details at the site etc. This

will enable a formal induction session which is mandatory for all employees and also for regular attendees.

Visitor Measures and Initiatives

Active & Sustainable Mode Measures

Friday Prayer Talks

- 5.24 Ahead of each of the Friday Prayer sessions, a member of the SMT will remind all visitors to the site to make use of active and sustainable modes where possible. In addition, at the end of each Friday Prayer session a member of the SMT will remind visitors to leave the site in a quick but calm manner.
- 5.25 In addition, for the first pair of Friday Prayer sessions each month a member of the SMT will hold a brief talk about travel prior to the prayer highlighting the areas in which visitors have done well and which areas may need improvement.

Website Information

- 5.26 A page on the website for the community centre and place of worship will be set up titled "How to access the site", which will include web portal addresses for route planners which have been set up by the government and are free to use. The list also consists of other relevant web addresses to assist in promoting sustainable travel. These include:
- TfL Journey Planner: <https://tfl.gov.uk/plan-a-journey/>
 - Citymapper: https://citymapper.com/london?set_region=uk-london
 - Google Maps (walking and bus route planner): www.google.com/maps;
 - Cycle Journey Route Planner: www.cyclestreets.net;
 - National rail / Live Train Departure Boards (train information):
http://www.nationalrail.co.uk/times_fares/ldb/?livedepartures.asp; and,
 - Car sharing opportunities: <https://como.org.uk/>.
- 5.27 The website will also have a brief summary of the aims and objectives of the Travel Plan. This will confirm what the site encourages, and what it discourages. This page will have an address of the site and a satellite map on the page so that any attendee can put the address of the site, and their

own address into the route planners to plan all the sustainable routes. Finally the webpage will have a contact number to the Travel Plan Coordinator.

Personalised Travel Planning

- 5.28 The TPC will offer a Personalised Travel Planning service for all new staff/volunteers, if requested. The TPC and will be able to draw on advice from and promote the use of journey planning websites including Citymapper <https://citymapper.com/london> and TfL's Journey Planner <https://tfl.gov.uk>.

Vehicle Mode Measures

Traffic Marshals

- 5.29 For key events in the weekly schedule – namely Friday Prayers and Community Functions, traffic marshals will be used to ensure that the local highway network operates in an efficient manner.
- 5.30 For the Friday Prayer session, a team of 3 traffic marshals will operate at the site from 20 minutes before the start time of Friday Prayer Session 1 until 20 minutes after Friday Prayer Session 2. It is noted that during the sessions, there may be a reduced number of marshals as they go to join the one of the two prayer sessions, however it will be ensured that at least one marshal is on duty at all times.
- 5.31 For a Community Function, a single traffic marshal will be used at the site from 20 minutes before to the start time of the function and from the end time of the function to 20 minutes after.
- 5.32 Traffic marshals will have the following tasks:
- Encourage car drivers to use the car park before parking on-street, whilst ensure that car drivers without a blue badge do not park in the accessible bays and non electric vehicles do not take EV charging bays within the site car park.
 - Manage the flow of traffic in the on-site car park to ensure that vehicles do not park / drop off passengers in a way that blocks others. Once the car park is full traffic marshals will also prevent additional cars from entering.
 - Encourage car drivers that are dropping passengers off in suitable locations close to the place of worship to do so quickly and provide them with advice on where to park if necessary once the drop off is completed.

- Communicate to any drivers parked illegally why they cannot park where they have stopped and provide information on where else they could park near the place of worship. This will include instruct drivers to ensure that their car does not block the driveway or nearby residents.
- Ensure that visitors to the place of worship do not park off-street in the driveways of nearby residents.
- Traffic marshals will organise a queue for pedestrians entering the site, to ensure that people enter the site in a fast and efficient manner.
- Ensuring that car drivers dropping off / picking off passengers turn their engines off to protect the air quality locally.

Car Sharing

- 5.33 While parking is available on-site, the TPC will actively encourage visitors to make use of more sustainable modes of travel to access the site and actively discourage driving to the site itself. Should the use of a car be the most suitable method of travel for visitors, such as those over 5km from the site, car sharing will be promoted to reduce the number of vehicles which may visit the site.
- 5.34 All visitors will have access to the webpage 'How to travel to the site', which will allow those people travelling from a similar location to share a vehicle. Information on car sharing will be on the notice boards. Car share is an important element of sustainable travel. A fact sheet will highlight the cost and environmental savings of car sharing compared to using the car as a single driver. This will be set up by the TPC prior to being consented and will be available on the "How to travel to the site" website and on the notice boards.

Greener Driving

- 5.35 The site will also promote greener driving information for those attendees that do use their vehicles to drive to the site. Raising the awareness of those drivers to look at driving more efficiently adds to the determined and robust nature the site has of promoting a reduction in carbon dioxide emissions.
- 5.36 In particular, traffic marshals at the site will encourage people waiting to pick up a passenger near the site to turn off their engines to ensure that idling cars associated with the centre are not polluting the air locally.

Neighbouring Residents Measures and Initiatives

- 5.37 As agreed during the public 'walk-in' consultation which was undertaken on the 29th November 2025, it has been agreed that the site will have a responsible person as a point of contact for local residents in the Belmont area.
- 5.38 It is anticipated that the TPC will act as this point of contact, since they will be the most involved with potential topics such as parking and noise – whilst also being best placed to encourage a shift in visitor behaviour.

6 MONITORING & REVIEW

- 6.1 This Travel Plan is part of a continuous process for improvement, requiring monitoring, review and revision to ensure it remains relevant to the development site. This section sets out the proposals for monitoring and review of the Travel Plan.

Review

- 6.2 The Travel Plan will be reviewed annually alongside the monitoring surveys in Years 0, 1, 3 and 5 to ensure the Travel Plan remains relevant and takes into account changing circumstances. The review mechanism will follow the stages set out below:

1) Review the Development's Transport Accessibility

- 6.3 The first stage will be to review the Development's accessibility by all modes. A short accessibility report will be produced based on Section 2 of this Travel Plan and will form the basis for the following stages.

2) Consultation with Occupiers

- 6.4 This will involve meeting/engaging with staff and visitors of the Development to promote the concept of a Travel Plan. The engagements such as online surveys and meetings will be coordinated by the TPC and will identify a common set of objectives for encouraging walking, cycling and public transport usage whilst discouraging the use of the private car.

3) User Consultation and Travel Surveys

- 6.5 This stage will include travel survey questionnaires (in Years 0, 1, 3 and 5) to examine the use of existing modes of travel, attitudes towards sustainable modes of transport and the most effective measures to promote sustainable transport for commuting journeys and business journeys. The TPC will consult with LBS at this stage. The travel surveys will be iTRACE / TRICS compatible.

4) Implementation

- 6.6 Stages 1 to 3 will provide the base information required to undertake a review of the Travel Plan.

5) Monitor and Review

- 6.7 The Travel Plan will secure an ongoing process of continuous improvement. Each version of the Travel Plan shall set out a mechanism of next steps to be tackled in line with the results of the travel surveys. The TPC will report back to the Council on an annual basis on how effective the Travel Plan is being in maximising the use of sustainable transport.

Monitoring

- 6.8 The Baseline Travel Survey will be undertaken within 3 months of consent. This will provide the baseline mode split information which will be known as Year 0. The surveys will predominantly cover modal split alongside information on what could encourage visitors and employees to travel more sustainably. The TPC may decide to undertake the questionnaire surveys online.
- 6.9 Further surveys will then be undertaken in Years 1, 3 and Year 5 within 1 month of the initial date of the Baseline Travel Survey (Year 0) to monitor the progress of the Travel Plan towards achieving its aims.
- 6.10 The Travel Plan recognises that it is not possible to force people to complete surveys, but incentives can be put forward to increase response rates. The travel surveys will be marketed by the religious leaders and the TPC to encourage a high response rate.
- 6.11 In addition, the following will be monitored by the TPC on a regular basis:
- The level of usage and condition of cycle parking facilities;
 - The detail and information provided in the Induction Sessions;
 - The number of visitors and staff utilising the personalised travel planning measure.
- 6.12 The TPC will compile a report each year (Annual Monitoring) that will include the results of any monitoring. This will include the results from the surveys at Years 1, 3 and Year 5, as well as monitoring of the uptake of the measures and initiatives to encourage use of sustainable modes of travel by visitors and staff. The reports will be issued to the relevant Travel Plan Officer at LBS.

Consultation

- 6.13 Consultation with staff/volunteers and visitors will occur as part of the monitoring process. This will include travel surveys for completion by staff and visitors as well as providing an opportunity (e.g. a meeting or forum) for users and the TPC to identify a common set of objectives for the effective encouragement of users of the site to make better use of public transport and physical modes of travel.
- 6.14 The TPC on behalf of the site owner will also consult with the Council and public transport providers as and when appropriate to ensure the Travel Plan remains up to date and takes account of any changes in accessibility in the local area, such as new pedestrian or cycle routes and/or revised public transport services and timetables.

7 ACTION PLAN

7.1 The Travel Plan Action Plan is outlined in **Table 8.1** below. The Action Plan will be revised every year following each Annual Travel Plan Review.

Table 8.1: Travel Plan Action Plan				
Action	Target	Funding	Measure	Responsibility
Appointment of Travel Plan Co-ordinator (TPC)	To be appointed prior to consent	The Charity	Appointment of Travel Plan Co-ordinator	The Charity
Provision of Cycle Parking	Before Occupation	The Charity	On completion of the Site	The Charity
Baseline Surveys	Once any prayer or community use activity is held on-site following the Development	The Charity	Receipt of survey results	TPC / The Charity
Set Targets	Within 1 month of Baseline Surveys	The Charity	Receipt of survey results	TPC
Promote Active Modes	On-going	The Charity	On-going	TPC
Interim Surveys	At Years 1, 3 and 5 following the Baseline Survey	The Charity	Receipt of survey results	TPC
Review of Travel Plan	Each year for a 5-year period with substantial reviews following interim surveys at Years 1, 3 and 5. Review undertaken within 1 month of the 12-month trigger point.	The Charity	Receipt of survey results	TPC
Achieve Targets	5 years after Baseline Survey	-	Receipt of survey results	TPC
